

SkierAlert® SP • Wireless Water Sports Safety System

Portable Base Station

MarineLink® Wireless Lanyard

Diligently Watching For A Fallen Skier, Wakeboarder, Tuber Or Man Overboard. The SkierAlert® SP is Always On Duty... The SkierAlert® SP utilizes patented MarineLink® Technology to closely monitor a Skier, Wakeboarder, Tuber, etc, and even doubles as a man overboard detector. When the Wireless Safety Lanyard is attached to a life jacket or belt, the Base Station will immediately sound when the signal from the Lanyard is broken or submerged in water.

To Use: Attach the display to your dash using the Base Stations's integrated suction cups. Attach the Wireless Lanyard to your belt (clothes or life jacket) and activate the power switch. The dash mount Base Station will monitor the Wireless Lanyard and instantly sound a 100dB alarm if the signal is broken, alerting you of a fallen skier, tuber, wakeboarder, a man overboard, etc.

FEATURES:

Base Station:

- Interference free MarineLink® wireless communication.
- Automatic Lanyard and Base Station battery monitoring system, with low battery indicators.
- Adjustable audible alarm up to 100dB.
- 360 degree pivot mount base can be hard mounted or stuck to a windshield with the included suction cups.
